SUMMARY

Software Engineer with 7+ years of fullstack experience in React, TypeScript and Node.js, with a path from junior developer to senior and chapter lead. Shipped products across web, mobile and desktop — from large-scale B2B SaaS to a software house serving multiple clients.

At **Clint Digital**, I led the React 16 → 19 migration in production and built the company's design system from scratch with Chakra UI. I delivered core platform modules — Subscriptions, Payments, Permissions, Contacts and Chat — and built the mobile version, while optimizing frontend performance, modernizing the build tooling (Webpack → Vite) and the monorepo, and establishing the automated testing infrastructure — work spanning **frontend infrastructure** (design system, monorepo, build and testing) and **developer experience** that accelerated the whole team. At **W16**, I grew from junior to frontend chapter lead, setting quality standards and mentoring the team across 7+ projects for different clients.

I work with **AI-assisted development** daily (LLMs, agents, Claude Code, Cursor) and shipped AI and automation features in production — plus built the **MarketMind** algorithmic-trading platform. Consistent experience in mentoring, architecture, and product decisions.

TECHNICAL SKILLS

Frontend: React 19, Next.js, React Native, Electron, TypeScript, Canvas API, Web Workers, Zustand, MobX, Tailwind CSS, HTML5, CSS/SCSS

Design Systems & Frontend Infrastructure: Chakra UI 3 (design system from scratch), reusable component libraries, monorepo architecture, developer experience (DX)

Backend: Node.js, Fastify, tRPC, Express.js, REST APIs, WebSocket

Database: PostgreSQL, TimescaleDB, Drizzle ORM, MongoDB, MySQL

Testing: Vitest, Cypress, Testcontainers, Jest

Build & Tooling: Vite, pnpm, Monorepo Architecture, Docker, AWS, ESLint, GitHub Actions

AI / LLMs: LLM API integration (OpenAI/Anthropic), AI & automation features in production, agents, AI-assisted development, algorithmic trading (MarketMind)

EXPERIENCE

Senior Fullstack Developer — Clint Digital

Jun 2023 – Feb 2026 | Florianópolis, SC (Hybrid)

- Led a full **React 16 → 19 migration** across the entire frontend — incrementally and with **zero downtime**, on a production platform used by **thousands of businesses**
- Implemented **Chakra UI 3** replacing Bootstrap 4 and built the company's **design system and reusable component library** from scratch — cutting new-screen build time by **~50%**, with stronger visual consistency and maintainability

- Built and shipped core platform modules: Subscriptions, Payments, Permissions, Contacts, and Chat
- Optimized frontend performance with **lazy-loading and code-splitting**, cutting initial load time of the main screen (Kanban) by **~40%** in data-heavy scenarios
- Migrated build tooling from **Webpack to Vite + esbuild**, reducing dev environment startup from **~4 min to ~40s**
- Built **monorepo package tooling** (pnpm, shared configs) to improve developer experience across the team
- Upgraded Node.js from a legacy version, modernizing the full dependency tree
- Established the automated **testing infrastructure** (unit + e2e) with Jest and Cypress
- Developed **AI and automation features** integrated into the product (automated flows and AI-based capabilities); designed and developed the platform's mobile version
- Mentored junior developers and made architecture and product decisions

Tech: React 19, TypeScript, Zustand, Chakra UI 3, Node.js, Jest, pnpm monorepo

Frontend Engineer (Junior → Chapter Lead) — W16 Software House

Feb 2019 – Jun 2023 | Florianópolis, SC (Hybrid)

- Progressed from junior developer to chapter lead in 3 years
- Led the front-end chapter: implemented quality standards, interviewed candidates, mentored new hires
- Shipped 7+ client projects across web, mobile, and desktop:
 - **Rokkos** — Marketplace with facial recognition (React, MobX, Material UI)
 - **Turno Inverso** — Mobile app connecting students with teachers (React Native, MobX)
 - **Let's Hike** — Trail safety app for Florianópolis (React Native, Redux)
 - **Engie TAG** — Institutional website for a natural gas company (WordPress, Sass)
 - **Unne** — Growth analytics PWA for SMBs (Vue.js, Quasar)

Tech: React, React Native, Next.js, Electron, Node.js, Cypress, Jest

Frontend Developer — Freelance

Sep 2018 – Feb 2019 | Florianópolis, SC

- Developed websites and mobile applications for local clients

OPEN SOURCE

- [evolution-graph](#) — Animated, responsive, dependency-free data visualization library. Published on npm.
- [pure-components](#) — Dependency-free UI component library with 17 components and 99% test coverage.
- [MarketMind](#) — **Algorithmic trading** platform (desktop) that processes real-time market data and runs automated strategies. Stack: Electron, React, tRPC, TypeScript, TimescaleDB.
